

Cookies are small, usually encrypted text files, which are used to perform various functions such as storing your preferences, allowing you to easily navigate between web pages, and improving overall user experience. These are located in browser directories and are useful since they have the ability to recognize a user's PC or mobile device, and customize the user experience by transmitting small amounts of information back to the site. Cookies also help 3rd party agencies to collect information about user profiles, their interactions, actions, and behavior, which help site owners to improve components and functionalities available on the website.

We do not collect personally identifiable information via cookies.

.

Highest levels of confidentiality are maintained while processing and analyzing this information, and encryption technology is used to keep visitor information anonymous.

By using our website, you agree to provide us your implied consent to the placement of cookies on your device, as explained above. In case you wish to remove these cookies from your device, you can delete these via your browser settings. You can also adjust your browser settings to block these cookies. However, please be informed that deleting or blocking cookies will adversely affect your user experience as certain parts of the website may stop functioning. User discretion is advised while deleting or blocking cookies.
